Activity 1: Introduction

[About the company: EcoShop]

EcoShop is a new online retail company that focuses on sustainable and eco-friendly products. The brand's mission is to help people reduce their environmental footprint by offering everyday items that are reusable, biodegradable, and ethically sourced. Its product range includes stainless steel straws, beeswax wraps, organic cotton clothing, and bamboo toothbrushes, all designed to make eco-friendly living simple and accessible. EcoShop is more than just a store—it aims to inspire a lifestyle of conscious consumption and responsibility toward the planet.

The company's main audience is Millennials and Gen Z consumers who care deeply about sustainability and want to support brands that reflect their values. These customers are willing to pay a little more for products that are transparent, ethical, and environmentally responsible. EcoShop stands out by ensuring minimal impact across its supply chain and by supporting environmental causes, which helps build trust and loyalty among eco-conscious shoppers.

As EcoShop's Digital Marketing Strategist, my role is to design and run a campaign that increases brand awareness, drives traffic to the website, and boosts online sales. The campaign will use a mix of digital marketing techniques, including SEO to improve search visibility, content marketing to educate and engage customers, and social media to build a strong community presence. Paid advertising will help attract new audiences, while email marketing will nurture leads and encourage repeat purchases. Analytics will be used throughout to measure performance and guide improvements. The overall goal is to establish EcoShop as a trusted and inspiring leader in the eco-friendly retail space, while creating a strong digital presence that reflects its values and supports business growth.

Activity 2: SWOT Analysis

2.1 Complete the Analysis

Strengths	Weaknesses
- Strong commitment to sustainability and ethical sourcing. - Wide range of reusable, biodegradable, and eco-friendly products. - Clear brand values that align with eco-conscious consumer trends. - Transparent supply chain and support for environmental causes.	- Limited social media presence and engagement - Small email list and lack of automated campaigns. - Low brand awareness as a new entrant in the market. - The website lacks educational blog content and storytelling.
Opportunities	**Threats**
- Growing global interest in sustainable living and green products. - Potential collaborations with influencers and environmental organisations. - Expansion into international markets and new product categories. - Use of SEO, content marketing, and PPC to increase visibility.	- High competition from established eco-friendly brands. - Rising costs of sustainable materials affecting pricing. - Consumer scepticism toward “greenwashing” practices. - Economic downturns may reduce spending on premium eco-products.

2.2 Analysis Report

[Use this space to **summarise** your analysis]

EcoShop is a new online retailer that specialises in sustainable and eco-friendly products. Its mission is to reduce the environmental impact of everyday consumer habits by offering reusable, biodegradable, and ethically sourced goods. The SWOT analysis highlights EcoShop's current position and guides how it can grow in a competitive market.

Strengths include EcoShop's strong commitment to sustainability and transparency. The company offers a wide range of eco-friendly products, from household items to clothing and personal care, which appeals to Millennials and Gen Z consumers. Supporting environmental causes also builds trust and loyalty among eco-conscious shoppers.

Weaknesses are mainly linked to being a new entrant. EcoShop has low brand awareness, limited social media presence, and a small email list. The website lacks engaging blog content, which reduces opportunities to educate and connect with customers. Higher product costs due to ethical sourcing may also limit reach.

Opportunities are significant. Global demand for sustainable products continues to rise, and EcoShop can leverage this trend through influencer partnerships, social media campaigns, and SEO. Expanding into international markets and new product categories offers further growth potential. Digital marketing tools like PPC and email automation can help attract and retain customers.

Threats include strong competition from established eco-brands and consumer scepticism toward "greenwashing." Rising material costs and economic downturns may also affect pricing and demand.

To succeed, EcoShop should use its strengths—authentic sustainability and ethical sourcing—to stand out. By addressing weaknesses through content marketing, social media engagement, and email automation, while seizing opportunities in growing eco-markets, EcoShop can build a strong digital presence and position itself as a trusted leader in eco-friendly retail.

Activity 3: SMART Goals

	**Specific -** Increase EcoShop's brand awareness and online visibility by improving social media engagement and website traffic through targeted digital marketing campaigns.
	Measurable - Achieve a 40% increase in website visits and a 25% growth in social media followers within three months, measured using Google Analytics and social media insights.
	Achievable - Use SEO, content marketing, and paid social media ads to reach eco-conscious audiences. Collaborate with at least three sustainability-focused influencers to promote EcoShop's products.
	Relevant - These goals support EcoShop's mission to promote sustainable living and drive online sales. Building awareness and engagement will help convert visitors into loyal customers.
	Time-Bound - Complete the campaign within three months, reviewing progress monthly to track engagement, traffic, and conversion improvements.

Activity 4: Buyer Personas

Use this table to create a well-rounded view of EcoShop's target customers, focusing on demographics, psychographics, behavioural insights, and customer goals. This information will help you guide your digital strategy effectively.

4.1 Persona 1

Category	Details
Persona Name	Eco-Conscious Emma
Demographics	
Age	25-35
Gender	Female
Location	Urban area [Johannesburg, Cape Town, or similar]
Income Level	Middle to upper-middle class
Psychographics	
Values	Strong belief in sustainability, ethical consumption, and environmental responsibility.
Lifestyles	Active, health-focused, and socially aware; enjoys yoga, outdoor activities, and minimalist living.
Interests	Eco-friendly products, wellness, organic food, and sustainable fashion.
Pain Points	Struggles to find trustworthy brands that are genuinely sustainable and transparent about sourcing.
Buying Motivation	Chooses products that reduce waste and promote a greener lifestyle; values brands that give back to environmental causes.
Behavioural Traits	
Shopping Preferences	Prefers online shopping with detailed product descriptions, eco-certifications, and customer reviews.
Buying Frequency	Monthly purchases, often restocking household essentials or trying new sustainable items.
Decision-Making Process	Relies on influencer recommendations, product

	reviews, and verified eco-labels before buying.
Marketing Insights	
Content Preferences	Prefers educational blogs, product usage guides, and sustainability tips that show how ecoShop's products help families live greener.
Engagement Style	Engages through newsletters, Facebook groups, and eco-friendly community pages; enjoys reading customer testimonials and sharing experiences online.
Customer Goals	Wants to reduce household waste, maintain a sustainable lifestyle, and find safe, eco-friendly products for the family.

4.2 Persona 2

Category	Details
Persona Name	Sustainable Sarah
Demographics	
Age	35-50
Gender	Female
Location	Suburban area [Durban, Pretoria, or similar]
Income Level	Upper-middle class
Psychographics	
Values	Believes in sustainability, family health, and supporting ethical brands.
Lifestyles	Family-oriented, enjoys gardening, cooking healthy meals, and teaching children about eco-friendly habits.
Interests	Home organisation, green living, and eco-friendly household products.
Pain Points	Finds it hard to identify genuine sustainable brands and worries about product safety for her family.
Buying Motivation	Chooses products that are safe, durable, and environmentally responsible; values transparency

	and long-term savings.
Behavioural Traits	
Shopping Preferences	Prefers online shopping with detailed product descriptions, eco-certifications, and customer reviews. Enjoys browsing sustainable lifestyle blogs before making purchases.
Buying Frequency	Makes small monthly purchases for household essentials and occasional larger orders for clothing or gifts.
Decision-Making Process	Considers product reviews, influencer recommendations, and verified eco-labels before buying. Looks for transparency in sourcing and packaging.
Marketing Insights	
Content Preferences	Engages most with educational blogs, product usage guides, and short social media videos that show how EcoShop's products help reduce waste.
Engagement Style	Follows EcoShop on Instagram and Facebook, subscribes to newsletters, and interacts through comments and eco-friendly community pages.
Customer Goals	Aims to live a sustainable lifestyle, reduce household waste, and support brands that protect the environment while offering quality products.

Activity 5: Selecting Digital Marketing Channels

5.1 Channel 1

Digital Channel: Instagram

Justification: Instagram is ideal for reaching Eco-Conscious Emma, who enjoys visual content and follows eco-friendly influencers. The platform's focus on imagery and storytelling allows EcoShop to showcase its sustainable products and lifestyle values in an engaging way.

Use: EcoShop will post high-quality photos, short videos, and reels highlighting product benefits, eco-tips, and behind-the-scenes content about ethical sourcing. Influencer collaborations will help boost brand awareness and attract younger, eco-conscious audiences.

5.2 Channel 2

Digital Channel: Facebook

Justification: Facebook suits Sustainable Sarah's family-oriented lifestyle and preference for community engagement. It allows EcoShop to share educational posts, product reviews, and eco-friendly living tips while building trust through direct interaction.

Use: EcoShop will use Facebook to run targeted ads, share blog articles, and create a community space where customers can exchange sustainability ideas and experiences. Regular posts and discussions will help strengthen customer loyalty.

5.3 Channel 3

Digital Channel: Google Ads

Justification: Google Ads helps EcoShop reach users actively searching for eco-friendly products. It targets high-intent customers who are ready to purchase, making it effective for driving website traffic and conversions.

Use: EcoShop will run keyword-based campaigns focused on sustainable living, reusable products, and eco-friendly household items. Ads will link directly to product pages and landing pages optimised for conversions

Activity 6: Developing EcoShop's Content Strategy

6.1 Outline the Content Strategy

EcoShop's content strategy aims to educate, inspire, and convert eco-conscious consumers by promoting sustainable living and showcasing eco-friendly products. The purpose is to build trust and position EcoShop as a reliable source for environmentally responsible shopping. The target audience includes Millennials and families aged 25–50 who value transparency, ethical sourcing, and sustainability. This strategy aligns with EcoShop's mission to reduce environmental impact by offering reusable, biodegradable, and ethically sourced products. Through informative blogs, engaging product descriptions, and visual video content, EcoShop will communicate its values and encourage customers to make greener choices.

6.2 Sample Topics or Descriptions

- Blog Posts

  - *"10 Simple Ways to Reduce Plastic in Your Home"*

  - *"Why Eco-Friendly Clothing Matters for the Planet"*

  - *"How to Build a Sustainable Kitchen with Everyday Swaps"*

SEO Keywords: sustainable living tips, eco-friendly products, reduce waste, green lifestyle.

- Product Descriptions

  Example Product: Bamboo Toothbrush Our Bamboo Toothbrush is a natural alternative to plastic brushes, made from sustainably sourced bamboo and biodegradable bristles. It's gentle on your teeth and the planet, helping you reduce plastic waste in your daily routine. Each brush is durable, compostable, and packaged in recyclable materials — perfect for anyone committed to eco-friendly living. **SEO Keywords:** bamboo toothbrush, biodegradable dental care, plastic-free hygiene.

- Video Content

  - *“How to Use EcoShop’s Reusable Kitchen Wraps”* — short demo showing product benefits and ease of use.

  - *“3 Quick Swaps for a Greener Home”* — lifestyle tips featuring EcoShop products in real-life settings.

6.3 Explain Content Distribution

EcoShop will distribute content across multiple digital channels to maximise reach and engagement:

- **Blog Posts:** Published on EcoShop’s website and shared via Facebook and LinkedIn to attract readers interested in sustainability education.
- **Product Descriptions:** Featured on EcoShop’s e-commerce site and optimised for Google Search to improve visibility and conversions.
- **Video Content:** Shared on Instagram, TikTok, Pinterest, and Facebook to engage visual learners and inspire eco-friendly habits.

This multi-channel approach ensures EcoShop’s message reaches both younger, visually driven audiences and families seeking trustworthy, educational content.

Activity 7: EcoShop Content Calendar Template

Week	Blog Post	Email Marketing	Social Media Post(s)	Paid Ads
Week 1	**Blog Title**: [How to start a zero-waste kitchen] **Goal**: [Inspire readers to make eco-friendly choices] **Publish Date**: Monday, 7 Sept	**Email Subject**: [“Eco-Friendly Tips for Your Home”] **Goal**: [Share the blog post link and highlight EcoShop’s latest products related to home sustainability.] **Send Date**: Tuesday, 8 Sept 2026	**Platform**: [Social Media: Instagram] **Content**: [Showcase EcoShop’s new sustainable product line with visually appealing images and a brief description of eco-friendly features.] **Post Date**: Wednesday, 9 Sept 2026	**Ad Type**: [Google Ads] **Campaign**: [Promoting eco-friendly household products.] **Objective**: [Target high-intent traffic searching for sustainable home items.] **Launch Date**: Friday, 11 Sept 2026
Week 2	**Blog Title**: 5 Easy Swaps for a Greener Bathroom **Goal**: Educate readers on simple product changes that reduce plastic waste and support sustainable living. **Publish Date**: Monday, 14 Sept 2026	**Email Subject**: Sustainable Self-Care Starts Here **Goal**: Promote eco-friendly personal care products and link to the new blog post. **Send Date**: Tuesday, 15 Sept 2026	**Platform**: Facebook & Pinterest **Content**: Share product photos and customer testimonials about EcoShop’s biodegradable bathroom essentials. Include eco-tips and links to the blog. **Post Date**: Wednesday, 16 September 2026	**Ad Type**: Google Ads **Campaign**: Promoting biodegradable personal care products. **Objective**:Drive traffic to product pages and increase conversions for sustainable self-care items. **Launch Date**:

				Friday, 18 Sept 2026
Week 3	**Blog Title**: Eco-Friendly Clothing and Your Carbon Footprint **Goal**: Educate readers on sustainable fashion and how clothing choices affect the environment. **Publish Date**: Monday, 21 Sept 2026	**Email Subject**: EcoShop's Clothing Range Spotlight **Goal**: Promote EcoShop's sustainable clothing line and link to the blog post. **Send Date**: Tuesday, 22 Sept 2026	**Platform**: Instagram & Facebook **Content**: Share behind-the-scenes photos of EcoShop's ethical sourcing process and short captions about eco-friendly materials. **Post Date**: Wednesday, 23 Sept 2026	**Ad Type**: Google Ads **Campaign**: Promoting sustainable fashion and ethical clothing. **Objective**: Target users searching for eco-friendly apparel and driving traffic to product pages. **Launch Date:** Friday, 25 Sept 2026
Week 4	**Blog Title**: 10 Simple Ways to Reduce Plastic at Home **Goal**: Inspire readers to adopt small daily habits that reduce plastic waste. **Publish Date**: Monday, 28 Sept 2026	**Email Subject**: Limited-Time EcoShop Offers **Goal**: Encourage conversions by promoting discounts on reusable household items. **Send Date**: Thursday, 1 Oct 2026	**Platform**: TikTok & Instagram **Content**: Post short videos showing "3 Quick Swaps for a Greener Home" and customer testimonials. **Post Date**: Wednesday, 30 Sept 2026	**Ad Type**: Google Ads **Campaign**: Retargeting high-intent visitors from previous weeks. **Objective**: Convert returning visitors into buyers and boost end-of-campaign sales. **Launch Date:** Friday, 2 Oct 2026

Notes: This four-week calendar ensures consistent posting across all channels. Each week focuses on a clear goal — awareness, education, engagement, and conversion — aligning perfectly with EcoShop's mission to promote sustainable living and eco-friendly shopping habits.

Activity 8: Creating a Customer Journey Map for EcoShop

Customer Journey Map Template

By mapping the customer journey, you'll gain insights into how EcoShop can enhance each stage, ensuring a smooth experience that meets customer expectations and strengthens brand loyalty.

Stages	Touchpoints	Customer Goals	Potential Pain Points	EcoShop's Response
Awareness	Social media ads, blog posts, influencer collaborations	Learn about sustainable living and discover eco-friendly product options	Uncertainty about which brands are genuinely sustainable	Use educational content and influencer partnerships to highlight EcoShop's transparency and eco-certifications
Consideration	Website product pages, customer reviews, email newsletters	Compare product quality, pricing, and sustainability credentials	Doubts about product effectiveness or authenticity	Display verified eco-labels, detailed product descriptions, and customer testimonials to build trust
Purchase	Online store checkout, payment options, promotional offers	Buy eco-friendly products easily and securely	Complicated checkout process or limited payment options	Simplify checkout, offer multiple payment methods, and provide clear shipping and return policies

Post-Purchase	Order confirmation emails, delivery updates, follow-up surveys	Receive products on time and confirm quality	Delayed delivery or unclear communication	Send timely updates, thank-you emails, and satisfaction surveys to ensure a smooth experience
Loyalty	Social media engagement, referral programs, exclusive offers	Stay connected with EcoShop and benefit from loyalty rewards	Lack of ongoing engagement or incentives	Launch loyalty programs, share eco-tips, and encourage repeat purchases through exclusive discounts

Activity 9: Identifying and Analysing KPIs for EcoShop

Complete the KPI analysis plan to evaluate campaign success and guide strategic adjustments. This plan will ensure EcoShop can maximise reach and engagement with its eco-conscious audience.

9.1 Key KPIs

Conversion rates by channel, website traffic from various sources, social media engagement metrics (e.g., follower growth, likes, comments, shares), and email performance metrics (e.g., open rate, click-through rate). These KPIs will help EcoShop measure how effectively each channel attracts and converts eco-conscious customers.

9.2 Trend Analysis

Organic search currently drives the highest conversion rate (4.2%), followed closely by email campaigns (5.0%). This shows strong purchase intent from users actively searching for sustainable products and from subscribers already engaged with EcoShop's content. Paid ads and social media have lower conversion rates, suggesting opportunities to refine targeting and messaging.

9.3 Weekly Tracking Goals

Monitoring weekly trends in website traffic, conversion rates, and engagement will help EcoShop identify which adjustments—such as SEO improvements, ad budget shifts, or new content formats—are most effective. Tracking these KPIs weekly ensures EcoShop can respond quickly to performance changes and maintain consistent growth.

9.4 Summary

The KPIs identified directly align with EcoShop's campaign objectives: increasing traffic, boosting conversions, and enhancing engagement. By focusing on conversion rates, traffic sources, and email performance, EcoShop can make data-driven decisions that strengthen its digital presence and build lasting relationships with eco-conscious consumers.

Activity 10: Identifying and Analysing KPIs for EcoShop

10.1 Website Traffic by Source (Pie Chart)

Chart: Pie chart showing distribution - Organic Search 40%, Paid Ads 25%, Social Media 20%, DirectTraffic 10%, Email Campaigns 5%

Summary: Organic Search drives the largest share of visitors, showing strong SEO performance. Paid Ads and Social Media contribute solid traffic, while Direct Traffic and Email Campaigns support retention.

Recommendation: Continue investing in SEO and Paidads while improving social media visibility through interactive posts and collaborations.

10.2 Conversion Rates by Source (Bar graph)

Chart: Bar graph comparing conversion rates - Email Campaigns 6%, DirectTraffic 5%, Organic Search 4.5%, Social Media 3.5%, Paid Ads 3%.

Summary: Email Campaigns deliver the highest conversion rate, followed by Direct Traffic and Organic Search. Paid Ads and Social Media show lower conversion efficiency.

Recommendation: Strengthen email marketing with personalized offers and optimize ad messaging to improve conversion rates.

10.3 Social Media Engagement (Side-by-side chart)

Chart: Side-by-side bar chart comparing engagement - Instagram [1800 likes, 250 comments, 300 shares], Facebook [1200 likes, 150 comments, 200 shares], Twitter [700 likes, 80 comments, 120 retweets].

Summary: Instagram leads in engagement, showing strong audience interest in visual content. Facebook performs moderately, while Twitter engagement is lower.

Recommendation: Focus on Instagram for visual storytelling and influencer collaborations; use Facebook for community discussions and Twitter for quick updates.

10.4 Email Marketing performance (Simple line graph)

Chart: Line graph showing , Open Rate 28%, Click-Through Rate 15%, Unsubscribe Rate 1.2%.

Summary: High open and click-through rates indicate strong audience interest and effective email content. The low unsubscribe rate shows good content relevance.

Recommendation: Maintain consistent email frequency, test subject lines for higher CTR, and continue offering valuable eco-tips and product updates.

Activity 11: Campaign Optimization

11.1 Optimization opportunities

Paid Ads: Refine ad targeting by focusing on high-intent keywords and updating ad copy to highlight EcoShop's eco-certifications.

Rationale: Current ads generate clicks but low conversions. By emphasizing trust factors like sustainability and verified eco-labels, EcoShop can attract more qualified leads and improve conversion rates.

Email Campaigns: Test new CTA buttons and personalize product recommendations using A/B testing.

Rationale: Open rates are strong, but CTR is low. Personalized CTAs and product suggestions will encourage more clicks and purchases by making emails feel more relevant to each subscriber.

Social Media: Increase Facebook post frequency and experiment with interactive content such as polls, quizzes, and user-generated posts.

Rationale: Instagram engagement is high, but Facebook is underperforming. Interactive content can boost engagement and foster community participation.

11.2 Monitoring Plan

To monitor optimization over the next week:

- **Paid Ads:** Track conversion rates and cost-per-click in Google Ads to measure improvement.
- **Email Campaigns:** Review CTR and A/B test results in email analytics to identify the best-performing variation.
- **Social Media:** Use Facebook Insights to track engagement metrics (likes, comments, shares) and compare weekly performance before and after adjustments.

Activity 12: Reflecting on EcoShop's Campaign Success

EcoShop's month-long campaign was a valuable learning experience that demonstrated how data-driven strategies can transform digital marketing outcomes. The most effective approaches were **SEO and email marketing**, which consistently delivered high conversion rates and strong engagement. An unexpected success came from **Instagram reels**, which boosted brand awareness and attracted new eco-conscious followers.

One of the main challenges was improving **click-through rates** in email campaigns. Through A/B testing and content adjustments, I learned how small changes—like refining CTAs and subject lines—can significantly increase engagement. Another challenge was low Facebook interaction, which was resolved by introducing interactive posts and polls to encourage participation.

This campaign deepened my understanding of **audience segmentation, performance tracking, and optimization**. I became more confident using analytics tools to interpret data and make informed decisions. It also taught me the importance of flexibility—adapting content quickly based on real-time feedback.

For future campaigns, I would recommend allocating more resources to **SEO and email personalization**, while continuing to experiment with creative social media formats. Strengthening paid ad targeting and refining eco-value messaging could further improve conversions.

Overall, this experience strengthened my passion for **digital marketing strategy and analytics**. It showed me how creativity and data work hand-in-hand to drive meaningful results. I now feel more prepared to pursue a career focused on campaign optimization and sustainable brand growth.
