Q1: TARGET AUDIENCE

RadiantSkin Co's target audience is primarily females aged 18-30, including students and young professionals with a moderate disposable income. This group is highly engaged in skincare and self-care routines as they value products that promote clear, healthy, and glowing skin. They are active on social media most of the time, frequently following beauty influencers and skincare brands for tips and product recommendations. Their purchasing decisions are often influenced by trends, reviews, and visual appeal. This audience seeks convenient, effective, and aesthetically pleasing skincare products that align with their lifestyle and personal image.

Q2: FOCUS PLATFORM

The optimal platform to use for this campaign is Instagram due to its highly visual nature and strong presence among the target audience. Instagram allows brands to showcase skincare products through high-quality images, reels, and stories, which are ideal for demonstrating product results and routines. The platform also has high engagement rates, making it effective for building brand awareness and customer interaction. Features such as influencer collaborations and targeted ads enable RadiantSkin Co. to reach potential customers efficiently and create a strong digital presence.

Q3: VISUAL ADVERTISEMENT EXPLANATION

The advertisement will feature a clean, minimal design, with warm pastel tones to reflect a premium skincare brand. The visual will include a youthful model with glowing skin applying the product with the bottled product depicted next to her. A short engaging product description such as "Our New Face Cream Meticulously Formulated to Protect and Hydrate Your Skin" will be included. The brand name will be clearly visible at the top, along with a compelling call to action button at the bottom of the screen titled "Unlock Your Glow". This design ensures clarity, visual appeal, and aligns with the expectations of the target audience.
